ABOUT US

Akasya Glass offers world-class solutions to its customers by using professional knowledge and technologies, without compromising its understanding of quality production, starting from 2007, when it started in the sector.

It has succeeded in raising its prestige and reliability in the sector to the top by being one of the leading companies in architectural and decorative glass processing with the power of its possibilities.

Akasya Glass continues its activities with the slogan "Let's Transfer Your Dreams to Glass" with its experience of more than twenty years in the sector and **Şişecam** quality.

OUR VISION

In line with the trust we have built in the industry with an understanding of high quality using innovative technologies by continuing our pioneering work with the products we produce is to transfer the power of glass to future generations.

OUR MISSION

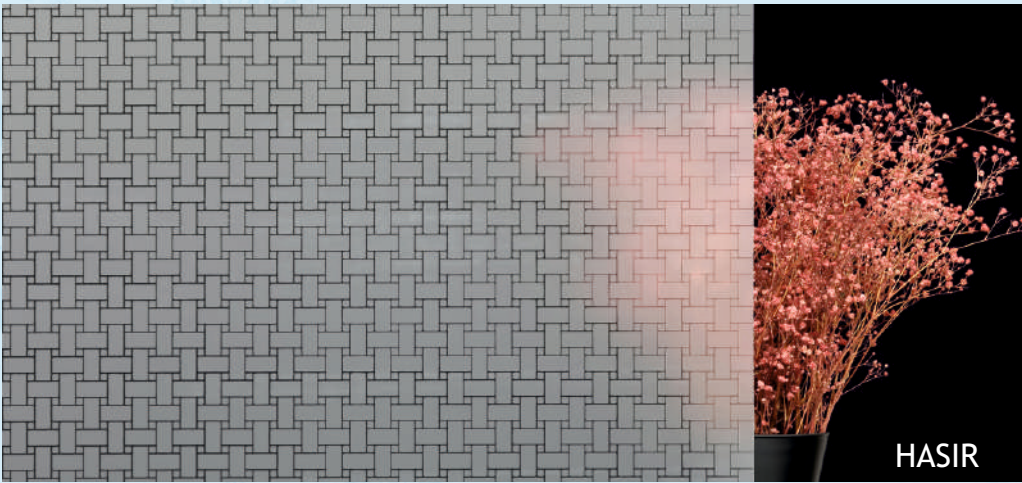

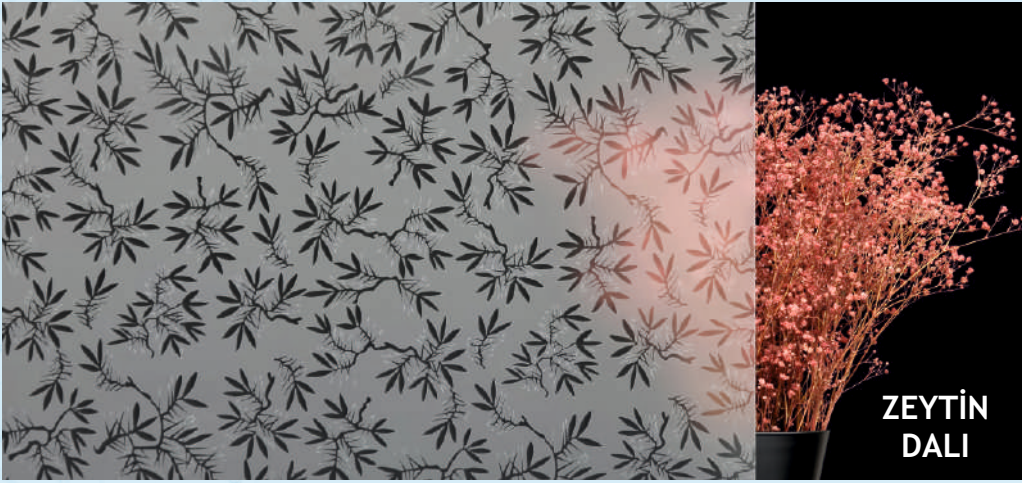

Our Mission Our approach based on customer satisfaction and to be the name of quality in glass with our professional perspective to design and manufacture glasses that add life to your life for is to continue.

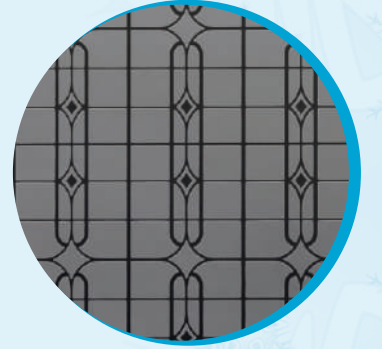

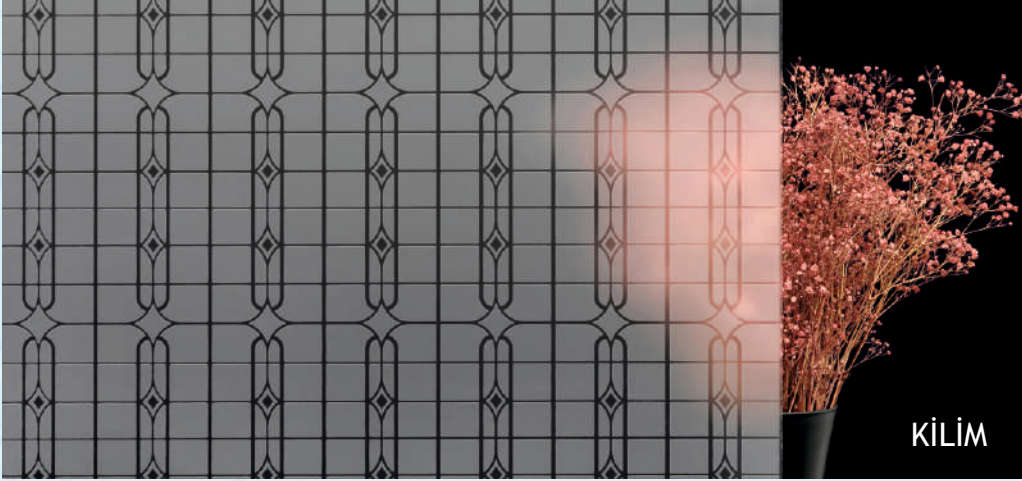

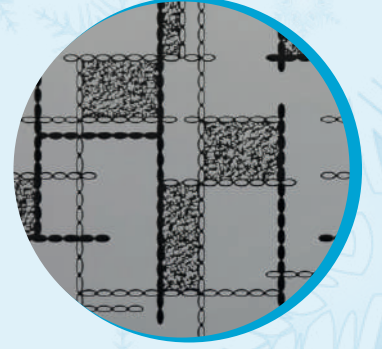

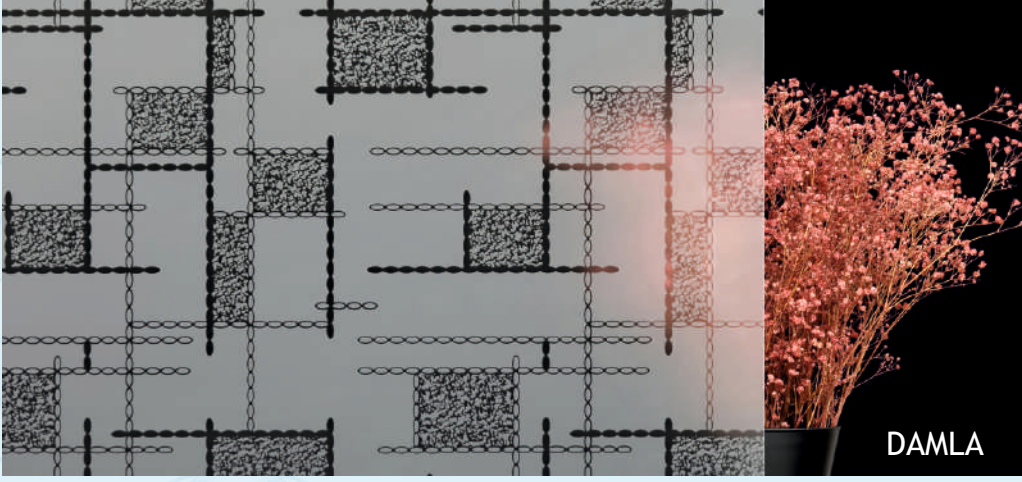

OUR VALUES

- To continuously improve our technology and experience,
- Having flexible production capability,
- Sustainable quality understanding and environmental awareness,
- Never compromising the principle of honesty.

Your Dream is Our Business

Satin and Decorative Glass

Satin glasses are glasses that are mattified by acid etching like sandblasted glasses. The biggest difference of satin glass from sandblasted glass is that the surface of the glass has a smooth silky texture. In addition, satin glasses can be tempered, curved and processed in all other glass processing processes. With these features, they are durable glasses that do not create fingerprints on the surface and are much easier to clean and maintain. The acid matting technique applied on satin glasses provides high light transmission, while at the same time preventing the other side from being seen. Akasya Glass has a glass production capacity of 2.000.000 m²/year.

Tempered Glass

Tempered glass, produced by a high degree of heat treatment, tempering process compatible with human health, against breakage. It is 5 times more durable than unmade glass.

Tempered glasses are generally used on the exterior of buildings, vehicle windows, in shower and tub glasses, oven glasses, glass railings, It is used in glass furniture, coffee tables and table glasses. Tempered glasses produced with Akasya Glass quality. **TS EN 12150** unconditional customer satisfaction principle in accordance with the standard is produced by adhering to it.

Laminated Glass

Laminated glass is also unbreakable glass like tempered glass. is called. These windows are caused by broken windows. Built to prevent injury. two or more special glass layer called PVB under heat and pressure. It consists of pressing with the help of a sheet. These glasses especially in the store, as it is also called safety glass. showcases, hospitals, hotels, banks, museums, used in schools, interior partition boards with Akasya Glass quality our laminated glasses are based on the principle of unconditional customer satisfaction.

ISICAM

Double glazing will accommodate dry air between the two windows. It is formed by combining in factory conditions. Double glazing units, also called insulating glass, reduce the losses by half compared to a single glass. Top of heat glass with the heat control it provides important benefits, to maintain the temperature. Also coated insulating glass. Thanks to this, the solar heat input is reduced by 40% and the spaces are protected. It keeps it cool in summer. Heat insulated double glazing. Thanks to its features, air conditioning and electricity usage are great. rate decreases. In addition, it is also very effective in sound insulation. is a material. In many places with its aesthetic appearance. It is the preferred application.

DEFINITION AND DESCRIPTION OF SPECIMENS

Manufacturer of Specimens: Akasya Cam Sanayi ve Ticaret A.Ş.
Address of Manufacturer of Specimens: Küçücek İhtilal Mah. Fabrikalar Cad. No: 43/2 Akasya - Sakarya
Specimens:
Type of Specimens / Products: Glass in Building - Thermally toughened soda lime silicate safety glass
Trade Name and Description of Product: Akasya Cam / 4/3/6-10 mm Thermally toughened flat glass
Specimen Data Form No. / Date: NİP-12150 / 06.12.2021
Total Number of Specimens: 15
Date of Manufacture of Specimens: 5.12.2021
Date of Delivery of Specimens: 6.12.2021
Date of Completion of Tests: 20.01.2022
Test Standard Used: TS EN 12250-1:2015+A1:2019 Glass in building - Thermally toughened soda lime silicate safety glass - Part 1: Definition and description
Product Standard: TS EN 12250-2:2006+D1:2019 Glass in building - Thermally toughened soda lime silicate safety glass - Part 2: Evaluation of conformity / Product standard
Total Number of Pages of Reports: 6 pages (Except cover page) + Annex

Standart Belgelendirme Denetim Deney Müayene ve Teknik Kontrol Ltd. Şti. is accredited by TÜRKAK under the registration number AB-0411-T for TS EN 12021:2017 as a test laboratory.
Türk Akkreditasyon Ajansı (TÜRKAK) is a signatory to the European cooperation for Accreditation (EA) Multilateral Agreement (MLA) and to the International Accreditation Cooperation (IAC) Mutual Recognition Arrangement (MRA) for the recognition of test reports.
